

INDEX TO TITLES

PRE-CONFERENCE WORKSHOPS

- 1A & 1B Introduction to Computerized Test Construction
- 2A Item Banking in A Global Environment
- 3A Test Validation using Structural Equation Modelling: A Primer
- 4A The Evolving World of Internet Recruitment
- 5A Converting from Paper-and-Pencil to Computer-Based Testing: Issues To Consider and Lessons Learned
- 2B Delivering Innovative Tests in A Global Environment
- 3B Methods for Detecting Problematic Items in Test Adaptations
- 4B Designing and Developing Computer Based Expert Systems: Test Interpretation and Decision Support
- 5B Certification Tests on The Web: Development, Delivery and Data Management

OPENING SESSION

- KEY 1 The Impact of the Internet on Testing: Issues that need to be Addressed by a Code of Good Practice

KEYNOTES

- KEY 2 Exciting New Technologies in Computer-Based Testing
- KEY 3 New Items and New Tests: Opportunities and Issues

A SYMPOSIUM: PSYCHOMETRIC ISSUES

- A1 Utility of the Mantel-Haenszel Procedure for Detecting Differential Item Functioning with Small Samples
- A2 A Comparison among Different Computerized Tests and Review Conditions
- A3 Rasch Model Goodness of Fit through the Analysis of the Parameter Invariance Property
- A4 Full Information Estimation of Ability with Multiple-Choice Items
- A5 An Evaluation of the Multiple-Group Mean and Covariance Structure Model for Detecting Differential Item Functioning in Graded Response Items
- A6 Do Items that Measure Self-Perceived Physical Appearance Function Differentially across Gender Groups?

B SYMPOSIUM: ITEM AND TEST GENERATION

- B1 Item Generation and The Internet: Expectations? No, Prescriptions for Progress
- B2 The Psychometric Implications of Using Generated Items
- B3 Principles of Item Generation
- B4 Multilingual Item Modelling as a Mechanism for Test Adaptation: Applications to Open Ended and Discrete Items
- B5 Schema Based Generation: The Online Numerical Reasoning Testing System

C SYMPOSIUM: VALIDITY ISSUES

- C1 A Proposed Strategy for Validating Computer Automated Scoring Methods
- C2 Standards for Test Quality: Applications to Computerized-Based Tests
- C3 Equivalence of Computerised and Traditional Ability Tests: Test Fairness and Construct Validity
- C4 Usability of Psychometric Admeasurements

D SYMPOSIUM: CBT APPLICATIONS

- D1 SIMTEST: A Foreign Language Proficiency CAT
- D2 Computer-Based Simulations to Assess Physicians' Patient-Management Skills
- D3 The Paperless Examinations Project - Steps towards Introducing Computer-Based Examinations
- D4 Dynamic Assessment of Learning Potential by Means of Linked Computerised Adaptive Tests
- D5 Automatic Item Generation Methodology: Theory, Current Practices, and Future Directions

POSTER SESSION 1

- P1 ASP = Assessment Service Provider?
- P2 Computer-Based Assessment in the Belgium Armed Forces
- P3 Computer-Based Objective Personality Assessment: a Rule Transgression Test
- P4 Computer-Based Assessment Training with Internet-Applications in an Educational Setting
- P5 Faculty & Student Perceptions of Security and Confidentiality of an Online Student Rating System

KEYNOTES

- KEY 4 Operational Issues in Computer-Based Testing
- KEY 5 Patrolling the Information Highway: Creating and Maintaining a Safe, Legal, and Fair Environment for Test-Takers

E SYMPOSIUM: OCCUPATIONAL ASSESSMENT

- E1 Self-Service Internet Assessment for Career Guidance and Recruitment
- E2 Testing on the Web - Identifying Impression Management using Response Latency Analysis
- E3 Achieving Self-Directed Development
- E4 Mode of Administration and the Stability of OPQ32i Scores
- E5 Impact of CBT Administration Technology on the Traditional Role of Psychologists in HRM Testing

F SYMPOSIUM: DATA PROTECTION

- F1 Data Protection: Why it is Important for Psychometrics
- F2 Data Protection in the UK: Code of Practice
- F3 Implementing the Code of Practice
- F4 Data Protection in the EU and US: Some Practical Implications for the Test Publisher

H SYMPOSIUM: TESTING AND THE INTERNET

- H1 Security Concerns for e-Testing
- H2 Who or What requires Guidelines about Assessment on the Internet?
- H3 Internet Test Security Lessons Learned
- H4 Five Myths about Internet Test Administration: Practical Advice and Lessons Learned from Early Adopters
- H5 Regulating Internet Based use of Psychological Tests: A United States Perspective

I SYMPOSIUM: TECHNICAL ADVANCES

- I1 A Comparative Study of IRT and Classical Item Parameter Estimates: Web-Based and Conventional Test Administration
- I2 A Comparison of Linear-on-the-Fly and Multistage Test Designs in making Credentialing Decisions
- I3 Using Collateral Information in IRT Parameter Estimation
- I4 Item Pool Design for CBT

J SYMPOSIUM: CBT APPLICATIONS

- J1 Certification of Test Users using the Internet
- J2 The Effects of Online Courses on Teaching English as a Foreign Language (EFL)
- J3 Using the Computer to Improve Diagnostic Testing: The Case of Tests of Information Processing Speed
- J4 Exploring Essay Marking Tools for Quality Assurance: The Tip of the Iceberg?

POSTER SESSION 2

- P6 Attitudes of Infertility Patients towards the Internet Based Research - Ethical Issues
- P7 Ten Ethical Issues Associated with Computer-Based Testing and the Internet
- P8 The First Attempt to Assess Cognitive Abilities by Means of the Internet in Estonia
- P9 Computer-Based Problem Solving Scenarios as Diagnostic Tools
- P10 Conducting Alignment Studies using Computer-Adaptive Tests

KEYNOTES

- KEY 6 Optimising Quality in the Use of Web / Computer Based Testing (wbt / cbt) for Personnel Selection
- KEY 7 Computer-Based Testing (CBT) for Professional Licensing and Certification of Health Professionals

K SYMPOSIUM: INTERPLAY BETWEEN E-ASSESSMENT AND E-LEARNING: ISSUES AND PRACTICE

- K1 Design of Assessment for e-Learning Environments: Traditional and New Approaches
- K2 The NAEP Problem Solving in Technology Rich Environments Project (TRE)
- K3 Embedded Assessment within a Scaffolded Learning Environment for Statistics
- K4 Assessment and Technology

L SYMPOSIUM: PRACTICAL ISSUES AND ADVANCES IN COMPUTER-AIDED ASSESSMENT

- L1 Gain Scores Interpreted from an IRT Perspective: A Comparison of Asymptotic and Exact Test Statistics
- L2 Decision Based Adaptive Testing
- L3 Issues and Models In Computerized Testing
- L4 Computer-Aided Testing, New Trends and Developments
- L5 Improvements in the Field of Personnel Selection through the Use of Neuronal Networks

M SYMPOSIUM: MEASURING ATTITUDE AND STYLE

- M1 Current Practice Issues in Relation to Internet-Delivered Personality Tests
- M2 Computer Game-Embedded Testing: Assessing Social Behaviour in a Conflict/Co-Operation Simulation
- M3 PASS This Way! A Bridge between Pupil Attainment & Attitudes
- M4 The Relationship between Patterns of Response Latencies and Scores in Computerized Personality Test

N SYMPOSIUM: HIGH STAKES EXAMS

- N1 A Retrospective on Performance-Based Testing
- N2 Technology Advances in Innovative Certification Items
- N3 Technology and Test Items in Computer-Based Assessment: Enhancing Measurement through Format and Design
- N4 Using Innovative Item Types to Improve the Validity of Certification Tests
- N5 Maintaining Security in Computerized Assessments: Practical Concerns Addressing Multiple Needs

O *SYMPOSIUM: PRACTICAL ASPECTS OF CBT*

- O1 The Hogrefe TestSystem: Towards an Integration of Test Development, Administration and Decision Making
- O2 Human Computer Interfacing Factors in CBT: Implications for Fair Testing Practices
- O3 Children's Perceptions of Computer-Based Assessments
- O4 Computer-Based Testing - The Candidate Perspective

POSTER SESSION 3

- P11 On Cut-Scores for the Modified Caution Index
- P12 X-PAT Uses in Applied Settings
- P13 BLOC-INFO: Software for BLOC-C and BLOC-S Spanish Language Tests
- P14 Self-Assessment for Brazilian Portuguese, and its Relationship to Adaptive Testing
- P15 Aachen Test Battery of Vocational Aptitude of the Deaf (Aachener Test System zur Berufseignung von Gehörlosen, ATBG)

Q *SYMPOSIUM: GUIDELINES & STANDARDS*

- Q1 Introduction to the Session
- Q2 BS 7988: A new British Standard on Using IT in Delivering Assessments
- Q3 Development History and Sample ATP Guidelines for Computer-Based Testing
- Q4 Report on the APA Working Party on Internet Testing
- Q5 European Criteria for the Evaluation of Computer-Based Test Interpretation (CBTI) Reports
- Q6 Discussion

KEYNOTES: NEXT STEPS IN CBT

- KEY 8 Facing Up to the Opportunities of the Future
- KEY 9 Inexorable and Inevitable: The Continuing Story of Technology and Assessment
